Who are **you** designing this system for?

Persona Name: Dr. Rebecca Stevenson

Persona Type: 37 Year-Old Primary Care Physician

User Profile

Dr. Stevenson is responsible for managing a large caseload of patients with diverse medical histories. She relies on the EHR system to review patient records, track medical history, and prescribe medication. She works long hours and is often interrupted by phone calls and emergencies. She values efficiency and accuracy in her work.

Wants / Needs

Dr. Stevenson needs an EHR system that is easy to navigate, provides accurate and up-to-date patient information, and integrates with other healthcare systems to facilitate communication with other healthcare providers.

User Quotes

"I need to be able to quickly access patient records and make informed decisions about their care."

User Experiences

Dr. Stevenson has experience using several different EHR systems, including Epic. She finds the Epic system to be comprehensive and user-friendly, but sometimes struggles with navigating the interface to find specific information.

Project Goals

The Epic software should be designed to allow easy navigation for healthcare providers, provide a comprehensive overview of patient records, and facilitate communication with other healthcare providers.

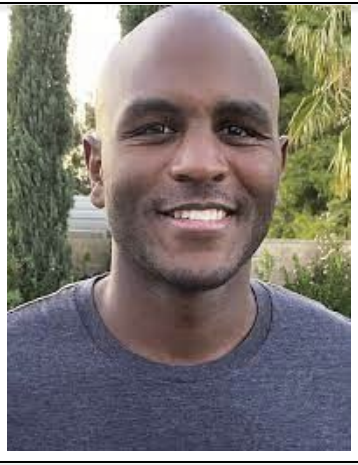

Who are **you** designing this system for?

Persona Name: Johnny Alexander

Persona Type: 45 Year-Old Patient

User Profile

Johnny is an active individual who enjoys spending time outdoors. He has a busy schedule but tries to stay on top of his health by monitoring his medication and keeping track of his medical appointments. He relies on the EHR system to keep track of his medical history and to communicate with his healthcare provider.

Wants / Needs

Johnny needs an EHR system that allows him to easily access his medical records, schedule appointments, and communicate with his healthcare provider. He values reliability and ease of use.

User Quotes

"I need to be able to access my medical records easily and make sure my healthcare provider has the most up-to-date information about my health."

User Experiences

Johnny has used the Epic system to access his medical records and communicate with his healthcare provider. He finds the system to be straightforward and easy to use, but sometimes experiences technical difficulties accessing his records.

Project Goals

The Epic software should be designed to allow patients like Johnny to easily access their medical records, schedule appointments, and communicate with their healthcare provider. The system should be reliable and user-friendly.
